

JULIA NICOLAS

Department of Sociology, CREST – ENSAE Paris – Institut Polytechnique de Paris

julia.nicolas@ensae.fr / +33 6 41 89 93 95 / [Website](#)

CURRENT POSITION

2023– **Ph.D. in Sociology (4th year), Center for Research in Economics and Statistics (CREST) - Institut Polytechnique de Paris**

Thesis Title: “Disparities in uptake of healthcare and preventive care across migrant backgrounds in France; examining the role of language and neighborhood characteristics.”

Supervisors: Patrick Präg (ENSAE – CREST), Sorana Toma (Ghent University), Paola Tubaro (ENSAE – CREST).

Advisory Committee: Mathieu Ichou (INED), Louis-André Vallet (CNRS) and Ognjen Obucina (INED).

RESEARCH VISITS

Jan. – Mar. 2026 **Junior Visiting Scholar, Nuffield College, University of Oxford**

Visit hosted by Christiaan Monden.

Visitor Grant from the European Consortium for Sociological Research (ECSR), academic year 2025–2026.

EDUCATION

2022–2023 **Master in Quantitative Sociology and Demography (SQD)**

Polytechnique Institute of Paris and Paris Saclay University

Training in quantitative sociology and demography, with courses taught at UVSQ, ENS Paris-Saclay, ENSAE Paris and INED.

2019–2022 **Engineering cycle, ENSAE Paris – IP Paris, Palaiseau**

Coursework in statistics, economics, econometrics, and sociology.

Major: Data Science for Social Sciences, including coursework in applied sociology and quantitative methods for the social sciences.

2016–2019 **Preparatory Class for “Grandes Ecoles” (CPGE MPSI-MP)**

Saint-Louis highschool, Paris

Intensive preparation for the competitive entrance examinations to French engineering schools, with coursework in mathematics, physics, and engineering sciences.

RESEARCH AREAS

Migration; Healthcare access inequalities; Intersectional inequalities.

My research focuses on inequalities in healthcare uptake in France, with a particular emphasis on immigrant populations. I examine the role of language barriers, intersectional inequalities, and local healthcare contexts in shaping the use of preventive care and medical services. My work primarily relies on quantitative methods and survey data.

PUBLICATIONS AND WORK IN PROGRESS

Julia Nicolas, Patrick Präg and Sorana Toma. “Language barriers and healthcare uptake: causal evidence from immigrants in France.” Available at [SocArXiv](#) (old version). Replication materials available on [OSF](#).

- Presentation at the European Consortium for Sociological Research (ECSR) conference, Barcelona, September 2024.
- Presentation in the panel session “Understanding ethno-racial inequalities in access to and experiences of healthcare” at the IMISCOE Conference, Lisbon, July 2024.
- Invited presentation at the Institut National d’Études Démographiques (INED), Paris, March 2024.

Julia Nicolas. “Cervical cancer screening among immigrant women and their descendants in France: an intersectional approach” Working paper. Draft available upon request.

- Presentation at Nuffield College, University of Oxford, February 2026.
- Presentation in the panel session “Migration, Health, and Wellbeing” at the European Consortium for Sociological Research (ECSR) Conference, Cologne, September 2025.
- Presentation in the panel session “Sociological roots of health” at the British Journal of Sociology (BJS) Conference, London, April 2026.
- Presentation in the panel session “Intersectional Approaches to Migrant Populations” at the European Population Conference (EPC), Bologna, June 2026.

Julia Nicolas. “Contextual determinants of healthcare uptake inequalities: the role of the local healthcare environment”. Working paper.

OTHER ACADEMIC ACTIVITIES

- Reviewer for the journals: *European Societies*; *Socio-Economic Review*.
- Co-organizer of the CREST Sociology Seminar.

RESEARCH AND PROFESSIONAL EXPERIENCE

May 2022 – Sep 2022 – **Research Assistant, Statistical service of the French Ministry of Ecologic Transition (Paris)**

Tutor: Béatrice Boutchenik. Study of the evolution of household sizes in France in relation to housing demand.

Jun 2021 – Sep 2021 – **Data scientist, Quadrat Études (Paris)**

Participation in several projects related to the study of labor market issues.

Jun 2020 – Sep 2020 – **Research Assistant, CREST**

Tutor: Thierry Kamionka. Work on mobilities in France and insertion into the world of work.

TEACHING EXPERIENCE

Lecturer

- Introduction to Social Sciences : Lectures – L3 students – ENSAE Paris. Fall 2024.
Designed and taught in collaboration with a colleague, this introductory course introduced students to the core concepts, theoretical perspectives, and methodological tools of sociology, as well as to more applied sociological topics.

Total teaching load: 16 hours.

Teaching Assistant

- [Descriptive Statistics with R](#) : Tutorials. Lecturer: Nicolas Baradel – L3 students – ENSAE Paris. Fall 2025.

Tutorial sessions introducing the basics of the R programming language for descriptive statistics and data visualization.

Total teaching load: 30 hours.

- [Introduction to Social Sciences](#) : Tutorials. Lecturer: Philippe Coulangeon – L3 students – ENSAE Paris. Fall 2025 & 2026.

Tutorial sessions focused on reading and discussing research articles, as well as introducing students to document analysis in social science.

Total teaching load: 3 hours in 2025 and 6 hours in 2026.

- [Econometrics 2](#) : Tutorials. Lecturer: Laurent Davezies – M1 students – ENSAE Paris. Spring 2024 and 2025.

Tutorial sessions covering advanced econometric methods, including Difference-in-Differences, linear panel data models, and regression discontinuity designs. The course also introduced non-linear models for limited dependent variables, such as logit and probit models, as well as censored and selection models (Tobit, sample selection, and truncation models).

Total teaching load: 72 hours (36 hours per year).

- [Surveys](#) : Tutorials. Lecturer: Guillaume Chauvet – M1 students – ENSAE Paris. Fall 2023, 2024, 2025 and 2026.

Tutorial sessions introducing principles of inference in finite population sampling, classical sampling designs, and weighting and calibration methods to correct for non-response.

Total teaching load: 48 hours (12 hours per year).

- [Introduction to Statistics](#) : Tutorials. Lecturer: Matthieu Lerasle – L3 students – ENSAE Paris. Spring 2024.

Tutorials for a course on statistical modeling, estimation, and hypothesis testing, with applications to the multiple linear model in econometrics (examples and simulations in economics, finance, and biostatistics).

Total teaching load: 18 hours.

Other teaching experience

- Weekly mathematics oral examinations ("colles") – MPSI preparatory class – Lycée Condorcet, Paris. 2021–2023.

LANGUAGES

- French: native
- English: bilingual proficiency
- Spanish: bilingual proficiency
- Italian: beginner level
